An Introduction to East Azerbaijan Health Center

Since East Azerbaijan Health Center is the joining body of all activities related to health, research, education and treatment, it is the unit which is of prime importance for Tabriz University of Medical Sciences (TUOMS). It is also under direct supervision of the University Chancellor and Health Deputy of the Ministry of Health. The main mission of this unit is to provide healthcare and medical services to all the people living in different parts of the province including those in cities, towns and villages. It also makes an effort to improve the health status of the community as a whole.

Organizational Objectives of the Vice Chancellor for Health

The main objective of the vice chancellor for health is to provide, maintain and promote the health status in society. Hence, it has set 3 main goals to be achieved including qualitative and quantitative development of health care and customer satisfaction. Among the mentioned items, this vice chancellor identifies the role of qualitative development as the main factor for customer satisfaction. In addition, considering health economics is another important aspect for the authorities of this unit.
